RE: Combination of Condominiums 1103 & 1104

Building & Grounds Committee
Board of Directors
The Harbours Condominium Association

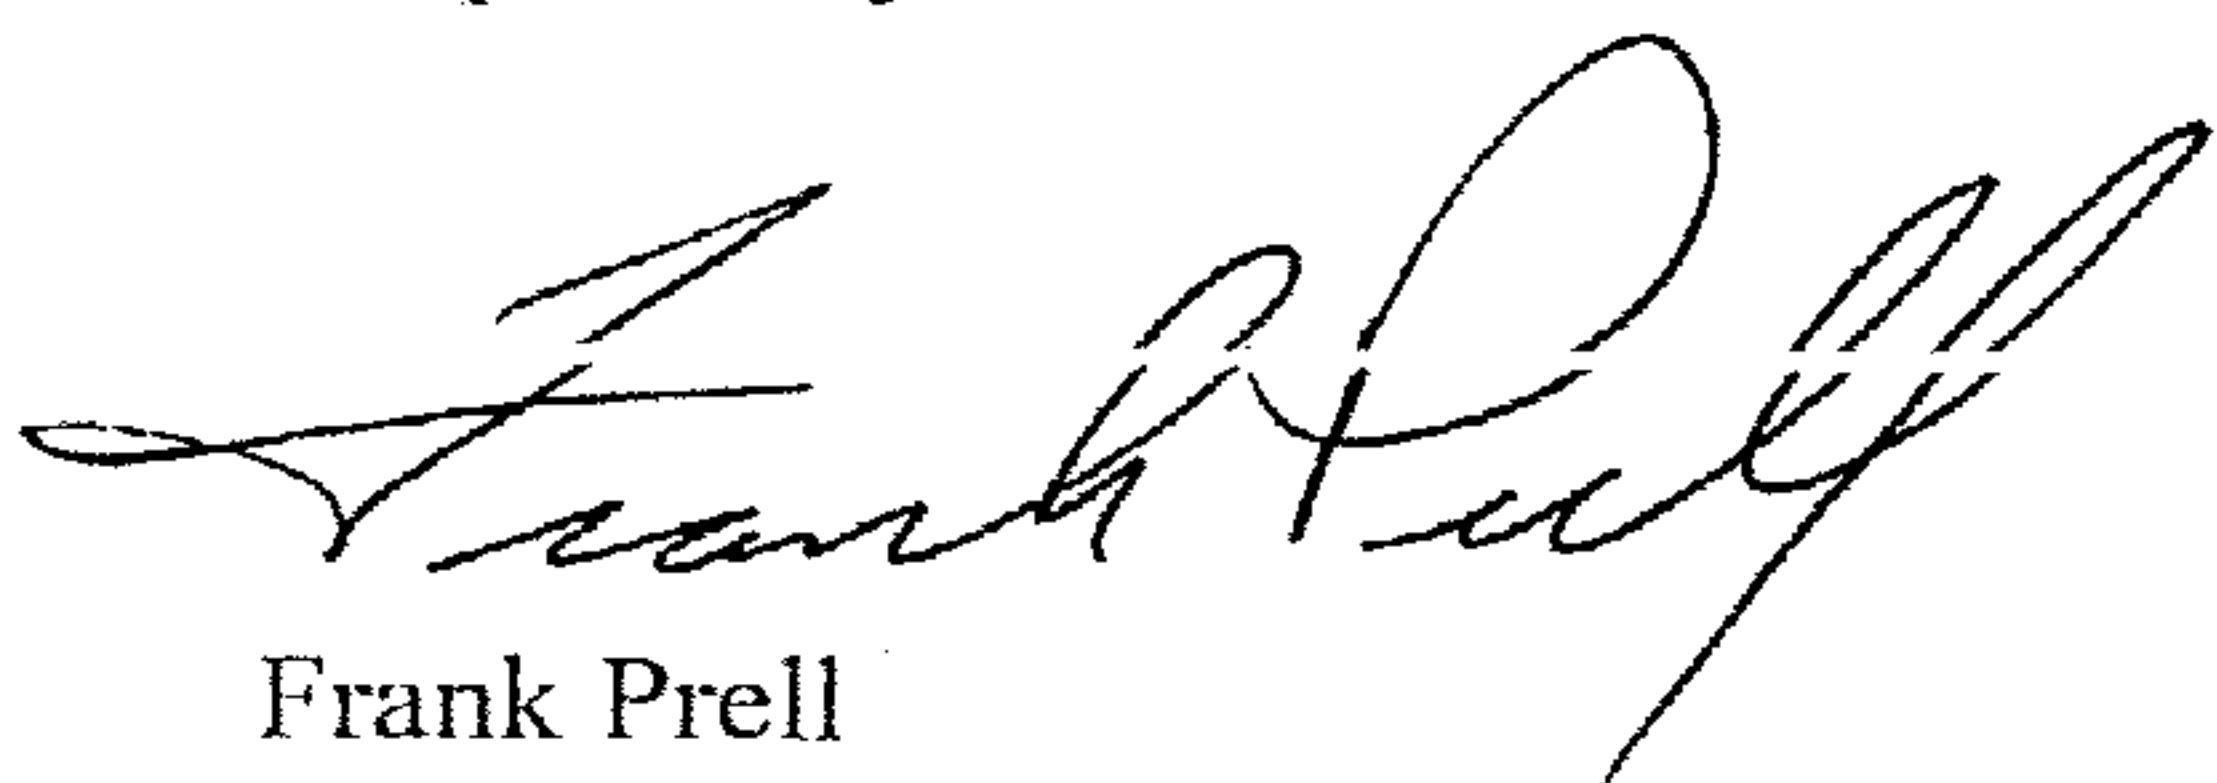

I would like to request permission to replace all patio doors and increase the height from 6' 8" to 8'. There will be no change in the dimensions of width.

Please understand that replacement is necessary to correct water leak issues. The threshold of the doors must be raised in the process of correction of the pitch to the exterior of the balcony.

Ultimately, if not corrected the water may travel to adjacent condominium and cause damage. I understand that I will be responsible for any repairs to the exterior EFIS and agree to work with Read Blai in coordination of contractors.

Time is of the essence in response to this request. Thank you for your time.

Respectfully submitted
